Place : Chennai-600119

I am a likable and enthusiastic person with a passion for problem-solving and critical thinking. I have over 3.6 years of experience as Backend developer and Data Processing. Collaborate with diverse teams to incorporate different viewpoints and ensure solutions. I am seeking to step forward in my career and knowledge.

### PROFILE SUMMARY:

- 3.6-year experience in SQL Server [T-SQL] Development and web Api Development.
- Working on the principle of 3D's Design, Development and Debugging the Stored procedure using T-SQL.
- Solving complex Query related issue and optimizing the code runtime performance.
- Good experience of giving technical support to the team and reducing bugs in multiple environments for good productionizing in live server.
- Experienced and Standard Knowledge in SSRS Report service.
- Designed email templates and implemented workflows to trigger automated emails and reports.
- REST and GQL Api Development using Dotnet and Tested using POSTMAN and tool. I also worked in several ETL Projects.
- Developed Chatbots Using COPILOT Studio.
- Integrated our services into third parties like grid webhook systems and Amazon and flipchart for Invoices Generations and Order Details.

### WORK EXPERIENCE:

- **Project Trainee**  
RAMCO SYSTEM LTD (CHENNAI)  
Jul- 2022 to SEP- 2022
- **Analyst Programmer**  
RAMCO SYSTEM LTD (CHENNAI)  
SEP- 2022 - Present-day

### PROJECTS WORKED

- **Client 1** :Tube Investment of India Ltd  
**Duration** : Sep 2022 - Feb 2023  
**Modules** : Purchase, Production, Reports  
**Description:**
  - Customized the **Production Budget** screen and implemented logic for **auto-generating item codes and short descriptions** based on input items.
  - Designed and developed **Product Structure reports** and **BOM reports** tailored to manufacturing requirements.
  - Created the **Product Testing** screen and configured **Email Template designs** for automated alerts and workflows.
  - Configured **workflow integration** between **Purchase Request (PR)** and **Purchase Order (PO)** screens for seamless procurement processing.
  - Developed **customized SSRS reports** for tracking BOM usage, production status, and purchase analytics.
- **Client 2** : Open Works US  
**Duration** : Feb 2023 - Present  
**Domain** : Facility Management Systems  
**Description:**
  - Customized and supported modules for Contracts, including Service-Based Contracts and one-time Contracts.
  - Designed and implemented Loan Summary Report with detailed breakdowns and integrated billing logic.
